Student number:

Having the following structure answer questions 1 to 3:

```
struct Product {  
    int sku;  
    double price;  
};
```

1. Create an instance of the structure **Product** and call it “**onSale**”
2. Create an instance of the structure **Product** called “**prd**” and initialize its **sku** to **9876** and its **price** to **12.34**
3. Assume that an instance the structure **Product** is already created and called “**outOfStock**”. Set the **sku** of the “**outOfStock**” **Product** to “**2468**” and its **price** to **99.99**.
4. Create a structure called **Employee** that has 2 member variables: an **integer** called “**employeeNumber**” and a **double** value called “**salary**”
